UEL School
Cass School of Education and Communities

The MA Special and Additional Learning Needs will support you in your initial and continuing professional development. You will gain the skills of early identification, intervention, and assessment for a wide range of additional educational needs. This will provide you with a detailed knowledge and understanding of the field of special education.

The programme will help you build your capacity to respond effectively to the diverse educational needs of all learners, and meet the legislative requirements for those with special and additional learning needs. You will have the opportunity to review the latest research in the area and engage with professional colleagues to develop a critical approach to inquiry within a special and additional learning needs context. This will support you in developing outstanding practice in relation to your own workforce.
